TRAIL

RUNNING PROFILE

The all new Yushan 3 is once again ready to play off-road and tackle a multitude of diverse terrains. This work horse is constructed with one-piece of engineered mesh fabric on the upper to ensure breath-ability and protection from the outdoor elements. This newest update is engineered to deliver excellent cushioning and comfort powered by our tried and true QU!KFOAM and QU!KSPRING technologies – it is built to go the distance on and off the road.

AUDIENCE

The YUSHAN 3 is geared for runners - new and experienced - seeking a well-balanced performance trail shoe that can tackle the majority of off-road terrains. It also meets the non-weekend warriors needs for those easy and casual low impact activities.

FEATURES

- **Newly ventilated and protective upper design** is perfect for those rugged conditions.
- **A one-piece engineered mesh** with a breathable under-layer mesh fabric to provide better ventilation, cooling the foot while delivering excellent support and protection. Protective heel guards designed and built to withstand the outdoor elements.
- **Anatomically designed Pressure Free Tongue** contours the top of the ankle for a more custom fit. It removes pressure and stress from the top of the foot during dorsiflexion by combining super-soft materials with an anatomical pattern.
- **Progressive NEW Logo design** on quarter panel.
- Full length **QU!KFOAM** and **QU!KSPRING+** technology combines excellent durability with cushioning and responsiveness.
- Durable Outsole: **H.A.R.T. (High Abrasion Rubber Tech)** provides grip for a stable running experience.
- **QU!KFOAM Insole sockliner** comprised of an EVA rubber blend for extra durability and comfort.
- **QU!K FLEX 4Foot Engineering** provides enhanced ground contact for better traction and acceleration.

361° YUSHAN³

TECHNICAL OVERVIEW

TRAIL

Secure, supportive and comfortable midfoot and heel environment maintained by the **MORPHIT system** secures a perfect lockdown during a run.

ONE-PIECE ENGINEERED MESH

A one-piece engineered mesh with a breathable under-layer mesh fabric to provide better ventilation, cooling the foot while delivering excellent support and protection.

ANATOMICAL PRESSURE FREE TONGUE DESIGN

The design contours the top of the ankle for a more custom fit. It removes pressure and stress from the top of the foot during dorsiflexion by combining super-soft materials with an anatomical pattern.

QUIKFOAM™

sockliner, comprised of an EVA rubber blend that provides excellent durability, cushioning and comfort.

PLUSH HEEL COLLAR SHAPE

Slippage prevention for a predictable hassle-free run is secured by supportive heel collar design and comfortable lining to cradle the heel.

HEEL GUARD

Designed and built to protect and withstand the outdoor elements and sharp vegetation

PP FILM AND HIGH FREQUENCY

Excellent stability without restriction through a High-Frequency Molded Heel design comfortably locking the heel in place and protecting the foot from any hard impacts while running off road.

UPPER DESIGN

PLATFORM DESIGN

TOE GUARD

Increased durability and protection from a new robust toe guard.

QUIK FLEX

QUIK FLEX 4Foot Engineering provides enhanced ground contact for better traction and acceleration. Flex grooves mimic the natural motion of the foot to deliver a natural and balanced toe-off.

QUIK SPRING+

Cushioning and responsiveness to elevate the running experience with QUIKSPRING+, our proprietary base EVA material.

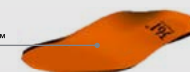

QUIKFOAM™

An extraordinary combination of cushioning and responsiveness with excellent durability facilitated through a midsole EVA rubber blend with PU coating.

HIGH ABRASION RUBBER TECHNOLOGY: H.A.R.T.

The anti-abrasion rubber in rear provides grip for a stable running experience.
